**Transparent Communication**
Whether spoken or written – our explanations, case studies, and recommendations are always straightforward and comprehensible. Our results are orderly structured and concentrate on the essentials.

**Tailor-made Solutions**
The project results are comprised of tailor-made solutions because standard solutions produce standard successes.

**Practice-oriented Concepts**
Together with our clients, we develop implementation-oriented concepts for lasting corporate success and also support their implementation – pragmatically and hands-on.

**Sound Practice**
Where methods and figures are involved rest assured that Andersch relies on sound practice and proven principles.

**Objective Assessments**
As an audit company, Andersch is obligated to be objective. We always provide case-specific, independent, professional assessments of the situations at hand, and of the corresponding opportunities, risks and objectives they present. These assessments serve as the neutral basis from which important decisions can be taken and, therefore, are of great economic utility for all parties.

**Respectful Cooperation**
Our focus is always on the client. Open communication with our clients always takes place on equal footing and with respect.

**Your Success Is Our Success**
We see ourselves as a supporter of business decision processes and are not looking to be the center of attention. We see the success of our client as the benchmark of our own success. As a result, both sides are aligned towards achieving the same goal.

**Expertise and Quality**
Solutions have to be tailored to the individual situation of the client even when these, for example, have to comply with specific standards or regulations. Andersch’s modular solution system produces reliable interim results that can be utilized throughout the project. This avoids duplicate work and duplicate costs.

**We only provide the services your situation demands**
Andersch tailors the necessary consulting services to the individual company situation as well as to its causes and liquidity situation:

- Business Planning & Plausibility Check in restructuring or growth phases
- Liquidity Management
- Support during Financing Negotiations
- Short Company Analysis
- Restructuring Concept including an expert opinion of the restructuring ability
- Operating Cost Reduction / Efficiency Improvement Programs
- Options Analysis
- Crisis Consultation

**Andersch supports a company during the entire implementation of the concept**

- Implementation of immediate measures
- Software-based change and project management: „impact“
- Communication, information, and monitoring (internal/external)
- Interim strengthening of management by the Andersch network
For more information about our range of services, please arrange for a non-binding personal meeting where we can sit down face to face and discuss how our services can be tailored to increase your company’s ability to meet future demands.
